Reception Pen

Minimalist Counter Pen

Professional Counter Pen

- All Scripator counter pens are simple and fast to replace without training
- Designed to be used extensively by multiple users
- The Scripator range has a tested Anti-Damage design. Both the pen holder and pen itself are designed to help prevent the chain or pen from being damaged

- Universal refills used by all Scripator pens, incorporating a visual low ink indicator
- Ergonomic non-slip and easy-grip design specifically designed for ease of use by all, specially those who find traditional pens difficult to use (elderly and arthritic etc).

- Space saving minimal counter 'foot print' unit fixed to counter top with screw or Ultra High Bond adhesive pad [provided].
- The permanent base plate stays fixed to counter top for easy interchange-ability of unit without removing the base-plate

- The silver rims on all 3 products are made of **zinc** and have a satin silver finish, aiding the partially sighted.
- The Scripator pen range works towards compliance with the Disability Discrimination Act (UK)

- **Tethered** by a cord rather than chain, the 710 has a unique feature - after use the pen slowly returns to the base station automatically
- The automatic return system is designed to minimise the writing resistance. The system automatically reduces the resistance when the pen is in the writing position
- The unit is self contained and does not require batteries or an external power supply
